

UNIVO GYM MANAGEMENT

Biometric Hardware, Member Onboarding & Fee-Locking Master Manual

1. OVERVIEW & SYSTEM ARCHITECTURE

Univo Gym Management includes a universal biometric access and attendance engine supporting Secureye, Realtime, ZKTeco, and e-SSL devices. The system enforces real-time fee expiry checks: if a member's plan has expired or fees are due, door access is automatically blocked with instant audio-visual alerts.

2. STEP 1: CONNECT MACHINE TO NETWORK (ONE-TIME SETUP)

- * **Power & Network:** Connect machine to 5V power adapter and plug in LAN cable or connect via Wi-Fi.
- * **DHCP Setup:** Open Menu -> SetComm -> Ethernet/Wi-Fi -> Set DHCP to 'Yes'. Router automatically assigns an IP (e.g., 192.168.1.9).
- * **Server Set:** Open SetComm -> Server Set -> Set DNS to 'No' (Local) or 'Yes' (Cloud). Set Server IP to computer/cloud server and Port to 7005.

3. STEP 2: ADD NEW MEMBER IN UNIVO GYM SOFTWARE

- * **Navigate:** Open Univo Gym -> Members -> Click '+ Add Member'.
- * **Fill Details:** Enter member's Name (e.g., Aman Verma), Phone Number, Workout Slot, and Plan (e.g., 3 Months Gold Plan - Rs. 3,000).
- * **Fee Status:** Select Paid or Due. Click 'Save Member'. Status becomes Active!

4. STEP 3: REGISTER FINGERPRINT ON THE MACHINE

- * **Open Menu:** Press 'M/OK' on the machine -> Go to 'Register' -> Select '1. New Reg.'
- * **Assign User ID:** Enter a machine User ID (e.g., 101) and select Fingerprint.
- * **Sensor Scan:** Ask the member to place their finger on the sensor 3 times until the machine confirms 'Enrolled Successfully / Thank You'.

5. STEP 4: LINK MEMBER WITH BIOMETRIC ID IN SOFTWARE

- * **Open Attendance:** Go to Univo Gym -> Biometric & Attendance -> 'Member Biometric IDs & Lock' tab.
- * **Map Machine ID:** Click 'Enroll Thumb' next to Aman Verma and enter the machine ID (101). Click Save.
- * **Result:** Member badge displays '#101'. Software and hardware are now synchronized!

6. STEP 5: DAILY ATTENDANCE & AUTOMATIC SECURITY CHECK

- * **Member Punch:** Member places registered finger on the sensor at the gym gate.
- * **4-Point Check:** Software verifies: 1) Plan expiry date, 2) Due balance, 3) Account active status, 4) Manual gate lock.
- * **Access Granted (Green):** If fees are paid and plan is active: Access Granted message appears, gate opens, and daily attendance streak +1 increments.
- * **Access Denied (Red):** If plan is expired or fees are pending: Access Denied alert appears, gate remains locked, and buzzer sounds.

7. FREQUENTLY ASKED QUESTIONS & SPECIAL CASES

- * **Plan Expired:** No manual deletion required from the machine. The software automatically locks the gate on expiry.
- * **Plan Renewal:** As soon as the owner collects fees or extends the plan, gate access unlocks automatically within seconds.
- * **Disciplinary Lock:** Click 'Lock Gate' in Member Biometric IDs tab to immediately suspend gate access for any member.
- * **Internet Downtime:** Machine buffers up to 100,000 punches locally. Offline USB sync is also supported via 'U-Flash -> Download GLog'.

8. RECOMMENDED BIOMETRIC HARDWARE FOR CLIENTS

- * **Realtime T502 / RS20:** Best for SaaS: Direct Cloud HTTP Webhook support, no local PC required (~Rs. 3,500 - 5,000).
- * **e-SSL K30 Pro / ZKTeco:** Best for Commercial Gyms: Heavy duty, magnetic glass door/turnstile relay support (~Rs. 4,500 - 7,500).
- * **Face Recognition (T52F):** Best for Modern Gyms: Touchless 0.3s face scan, impervious to sweaty fingers (~Rs. 6,000 - 9,000).
- * **Secureye S-B8CB:** Reliable entry-level machine: TCP/IP & USB flash drive support (~Rs. 2,500 - 3,500).
